Mamiya C330 with lens and focusing hood removed The Mamiya C series is a line of system cameras manufactured by between 1956 and 1994.. This model was 340 grams lighter than the previous model C33, which weighed 2040 grams (with 80 mm lens).. 8 And I primarily agree But comparing the images, the build, the price point and the extensive lens availability, and the Mamiya C330 will actually more than hold it's own in a head to head competition.. Uses 120 and 220 rollfilmsWith the rack and pinion bellows type focusing system, close-up photography is possible without attachments.. Extended bellows for close-ups
